

Position: Web Developer

Company: Redwood Technologies

Location: Bracknell, UK

Reporting Relationship: Department Head – Applications Engineering

Website: www.redwoodtech.com

Redwood Technologies is a world leader in cloud communications integration and customer engagement technology

With offices in the UK, US, Netherlands, Germany and Japan, our award-winning proprietary cloud services power some of the largest organisations across the globe. Operating in sectors ranging from utilities and travel through to finance and government, our clients include EDF Energy, Sodexo, G4S, and the UK's National Health Service (NHS).

Our mission is to enhance the way the world communicates. With our omni-channel cloud contact centre solution, **storm**[®], we enable businesses, customers and colleagues to interact across social media, video, SMS, email, web, web chat, and emerging technologies, such as WebRTC. We connect to hundreds of external systems, including AI, information and logistics systems, to bring information and communications together and deliver the customer experience of tomorrow.

We take pride in our core beliefs of teamwork, quality and agility. Time and again, this ethos has been reflected in our high-quality products and our aptitude for providing quick, responsive solutions to our customers. With a core staff of intelligent and passionate individuals, we are looking for new members to continue upholding our beliefs and to catalyse further successes as we expand on a global scale.

The Web Developer Role

We are looking for a highly motivated and experienced Web Developer to join our Application Engineering team.

What you'll do:

- Design and develop complex web-based applications, maintaining best practices with a variety of programming languages, databases, UI, and procedures
- Collaborate with different departments to continually improve and polish the capabilities of our applications
- Manage the day-to-day activities of software projects by tracking and analysing progress and collaborating with Project Managers when necessary
- Offer technical input during the tendering phase of projects
- Maintain a strong awareness of industry developments to provide a framework for driving innovation within the business

Job Description

Web Developer

Who you are

- Someone with a minimum of 2 years of web development experience
- Experience in programming in PHP, JavaScript, HTML5 and CSS
- Framework experience, such as Symfony, Vue.js
- Experience in source control, in particular Git
- Experience in continuous integration or deployment
- Familiar with tools such as JIRA
- Well organised with excellent attention to detail
- Experience of working in an Agile environment, preferably SCRUM
- Familiarity with unit testing, in particular PHPUnit

Desirable

- Experience in designing and building scalable, responsive systems
- Experience in NoSQL such as ElasticSearch
- Knowledge of technologies such as WebRTC, AJAX and Web Sockets
- Knowledge and experience working to OWASP ASVS or equivalent application security standards
- Experience in SQL such as Microsoft SQL Server and PostgreSQL
- Experience in web service development, ideally using .NET
- Proven experience of delivering applications with a high degree of usability
- Experience in using Jenkins and Puppet
- Experience in using test tools such as Selenium Web Driver, SoapUI, Burp Suite
- Ability to converse with users at all levels of IT literacy and rank

Other Requirements

- Relevant documentation to work in the UK on a permanent basis
